

DRIVING INNOVATIVE AND SUSTAINABLE PROJECTS

“Utilising technologies developed in the 21st century, to provide environmentally friendly and financially viable green solutions

OVERVIEW

WHO WE ARE

- CJL Consulting is an international project management company offering our business partners and the Green Group EPCM services and PM expertise in many areas of operation
- These areas include raising project finance, project management, turnkey project establishment and advice on business operations
- The Green Group consists of various divisions that are setup to meet the requirements of Green project establishment

FUTURE VISION

- To provide internal funding of future Green Projects with Green Coin Tech and other investment sources, for them to receive a solid ROI from established project operations
- Establishing several Green projects including energy production, minerals, mining, industry, agriculture and manufacturing.
- Providing solutions for sustainable clean power generation
- Being constantly environmentally friendly and sustainable in all future projects

THE OPPORTUNITY

PROJECTS

Investment into Green Group and CJL
Consulting projects via investors and
the “GCT” crypto

Several **international projects**
available for revue and
establishment

High ROI 3x to 7x investment
amount from various sources within
planned projects

GROWTH

Ongoing review of projects that can be
established into the Green Group

Opportunity to **expand immediately**
with revenue available from
established projects

Establishment of new projects in all
areas of business

FUTURE

Reaching more investors in the
market wanting to be involved

Form the Group and **leverage project
resources and opportunities** to
increase turnover and ROI profit margins.

Increased project **opportunities
and investment options** as a bigger
group with existing operations

STRUCTURE

Green Coin Tech
launched to raise capital required for Green projects

Green Agriculture
projects include activated charcoal production, hydroponics and aquaponics

Green Power
establishment of clean base load power generation

Green Coal Technologies
coal slurry and discard dump reclamation

Green Water
wastewater management and reclamation

Green Medicinals
organic and natural medicinal products

INVESTMENT - ROI - NET PROFIT

Repayment of investment over 3 to 5 years and profit calculated over 20 years

- Investment US\$20 000
- Electronic platform setup - Coin launch – Project Investment
- Profit = Coin traded value increase + 20% Profit from projects + 10% interest on repayment of investment capital
- Total 30% Net profit ROI projected at US\$ 56M over 20 years

- Investment US\$1,645,000
- Activated Charcoal Plant – Mauritius
- Net Profit \$36.9M after payment of Capex
- ROI 79.5% – NPV \$5.8M – IRR – 107.2% over 7 years - Net profit \$8.4M

- Investment US\$35.6 M
- Carbon plant Waste Heat Recovery 10MW baseload power generation plant
- Net profit ROI = \$156M after repayment of investment, tax and costs

PROJECT USE OF FUNDS

Software programming – Coin and code design
Trading platform registration and create liquidity pools
White paper preparation and presentation
Legal and website registration fees

Activated charcoal plant purchase and construction
Warehouse acquisition
Company registration and legal costs
Operational equipment and moveable asset purchases

Boiler and turbine purchase, plant construction and commissioning
Connection to the CEB 66KV grid including breaker yard and OH line
Operations – Engineering – Project site establishment

MANAGEMENT TEAM

Colin Lotter
Managing Director

Over 30 years of experience as a business owner, with qualifications in both electrical and mechanical engineering.

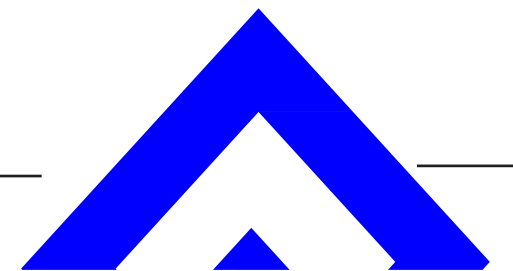

Complete understanding of coal and carbon related applications, electricity generation and emerging technologies, focusing on establishing revolutionary **GREEN** projects and sustainable power generation solutions for environmental sustainability

Bianka Louw
Company Secretary

Over 15 years of experience in water management and sanitation, alternative natural medicines, and sustainable rehabilitation.

Experience in business management and administration, with an excellent understanding of establishing practical and digital control systems that allow for efficient business operations

MANAGEMENT TEAM

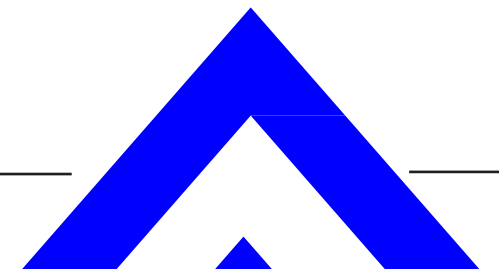

Rajiv Adjodha
Commercial Director

Rajiv has more than 15 years experience in project management, operations, IT infrastructure, renewable energy innovation and has been awarded multiple national and international awards in Science, Technology and Innovation

Gerald Grenade
Projects Director

Gerald is a Registered Professional Engineer with the Council of Engineers of Mauritius, with over 40 years in electrical & electronics engineering and has been involved in the commissioning of many projects in Mauritius over the years, from process control, large-scale project execution in sugar, textile and industrial sectors
