**DRIVING INNOVATION AND SUSTAINABILITY THROUGH GREEN PROJECTS**

“Utilising technologies developed in the 21<sup>st</sup> century, to provide innovative, environmentally friendly and financially viable green solutions for projects”

January 2025

Confidential

# Green Coin - The Opportunity

- Green Coin Token and [www.greencontech.com](http://www.greencontech.com) has been established to raise capital for various **GREEN** projects. Projects are established to utilise 21<sup>st</sup> century technologies to ensure efficiency, economical viability and to be environmentally friendly.
- CJL Consulting is a project management company that has various **Re-Fi** (Regenerative Finance) **GREEN** projects under review that require funding for establishment. Projects will include power generation, rehabilitation, waste management, waste water management, agricultural and natural medicinal products.
- The Green Coin's primary focus is to simplify the process of entry to invest, by providing a digital platform for investors interested in discovering both the crypto and commercial investment space and understanding the Green Coin link between the two sectors.
- Purchasing Green Coin, will allow for investment into real time projects, which will create a stable Green Coin linked to stable coin trading platforms, providing a ROI (Return on investment) and increasing the traded value of the coin.
- Once investment into Green Coin meets a required Project Capex Requirement, the Investment is offered to existing coin holders who upon acceptance to invest, will move the coin to a stable coin. Investment into Green Coin projects will allow the change required for a better, **GREEN'er** future and create one of the most sought-after crypto investments available worldwide.

# Green Coin – NCC Token Development process

- The NCC GREEN Coin will be traded on Trading Platforms (in progress)
- The value of the NCC GREEN Coin at \$1.00 is fixed at 0.0003 ETHER.
- Only 200 million GREEN Coins will be issued on the platform that has been developed and deployed on the Live Ethereum Network and backed by the stable Ether coin value
- Full 3D Model of Coin to be physically produced on request

**NewCo Green Coin - Front View**

**NewCo Green Coin - Rear View**

# Green Coin – NCC Token Development process Contd.

- See: Coinmarketcap [www.coinmarketcap.com/currencies/ethereum/](https://www.coinmarketcap.com/currencies/ethereum/) – Ether has increased by 2,453% in 5 years from 2021 to 2025 = Ethereum Market Cap = \$44 Billion

<https://www.coinbase.com/price/ethereum>

# Green Coin – Investment Development Process

- Preferential listing (ICO) of **GREEN Coin** offered to Level 1 investors – Limited coins available long term
- Trading of **the Coin** commences “Going Live” - Upon initial coin sales reaching \$35M CJL Consulting to propose the **GREEN** Project Investment.
- **The Coin** will immediately be traded on International Crypto Exchanges such as DAO1 (<https://dao1.ai/>)
- **The Coin** value will increase when traded on platforms, based on **Coin** and **Project** value
- Ownership of a single **Coin** allows the decision to invest into specific **GREEN** Projects, thus a single coin equals a share of the **GREEN** project.
- Individual “**GREEN** Project Wallets” will be created for each project investment into **GREEN** Projects
- Full disclosure of proposed investment and project ROI via Project Investment Prospectus available in the website online
- Disinvestment from the **GREEN** coin trading platform can be undertaken at any time by a Coin owner with no penalty.
- Disinvestment from a Green Project can only be undertaken once the project is established, but with no penalty.
- Only **GREEN** Project Wallets and associated Coin investors will obtain ROI from **GREEN** Projects, this ROI is not available to crypto Green Coin holders who did not invest into the various **GREEN** projects.

# Green Coin Crypto Investment Profit Potential

- ✓ **Green Coin** launch purchase price = \$1.00 (ETH 0.0027) + Transaction fee – (Once off Ethereum charges and network GAS fees – Register individual coin accounts – Site and trading management fees)

- ✓ **GREEN** Projects available to commence immediately
- ✓ Real Green Coin value based on initial ICO + Project ROI
- ✓ All projects proposed under CPR, BFS and/or business plan
- ✓ Green Coin backed by trading and project performance

# Green Coin Technical Facts..!!

- **Green Coin** utilises the open source Ethereum Network for operation and trading, all transactions within Green Coin are open and transparent. Green Coin is built on block chain technology, but the operation, protection and nature of the Ethereum open-source software platform is such that, protection of the data in the Green Coin platform is the best available
- Every coin purchase by investors, that may move into project investment, are provided unique Green Coin ID's from which all transactions can be tracked. No transaction can be undertaken from a Green Coin Wallet without the account owner authorising the transaction (Like a bank account)
- Although Green Coin is a crypto currency, it is designed to have unique features, like few other available currencies in the world, as few crypto coins and tokens have a real life asset generating profit supporting the investment available, as an additional ROI
- Only 200 million Green Coins will initially be issued, the plan to list the Green Coin trading platform with open and transparent operation allows Green Coin to meet all trading registration requirements with Ethereum and international trading platforms
- It is the intention of Green Coin to create an investment crypto currency with a solid annual ROI better than other stable coins, rather than a potential **valueless** crypto, built only on the value of the coin being traded
- Green Coin will meet all tax related requirements and compliancy on the various trading platforms and will clearly indicate where Green Coin and the investors responsibilities begin and end in this regard.

# Green Coin – Management & Development Team

**CJL Consulting: Driving Innovation and Sustainability** led by Colin Lotter, is a dynamic force in engineering and sustainable development. With qualifications in both electrical and mechanical engineering, Colin brings decades of expertise and innovation to the table. His career began at Eskom's Tutuka Power Station in South Africa during the 1980s, where he gained a comprehensive understanding of coal-burning requirements in industrial and power generation boilers. This foundation sparked his passionate vision for advancing clean coal power generation and pioneering mine discard rehabilitation across sectors such as metals, vanadium, gold, iron, chrome, and coal.

Colin's vision goes beyond industry norms, focusing on establishing revolutionary **GREEN** projects and sustainable power generation solutions that address the urgent global demand for clean energy. With over 30 years of experience as a business owner, coupled with his deep understanding of electronics and emerging technologies like cryptocurrencies, Colin is spearheading initiatives like The **GREEN** Coin. This innovative approach empowers individuals and communities while driving progress in renewable energy and environmental sustainability. At CJL Consulting, Colin Lotter combines technical expertise, entrepreneurial spirit, and a commitment to making a tangible difference in people's lives, creating a future where innovation and sustainability go hand in hand.

# Green Coin – Management & Development Team

**Bianka Louw Co-Director | Environmentalist | Innovator.** With over 15 years of experience in water sanitation, alternative natural medicines, and sustainable rehabilitation, Bianka is a dynamic leader committed to creating impactful solutions for a better world. A passionate environmentalist, she champions innovative approaches to industry challenges, particularly in agriculture and mining, where she integrates sustainability and forward-thinking strategies.

Bianka's leadership philosophy is rooted in empowering others—leading by example and fostering a culture where teams thrive and individuals reach their full potential. Her unwavering honesty, integrity, and drive to see others succeed make her a transformative force in any project. She is known for her adaptability, passion for continuous learning, and dedication to making meaningful change.

A firm believer in doing more and saying less, Bianka's hands-on approach and unique perspective align perfectly with the company's mission to revolutionize traditional practices. Her commitment to sustainable development and forward-thinking initiatives ensures that projects under her guidance not only achieve success but also contribute to a healthier, more sustainable planet.

# Green Coin – Project Investment Overview

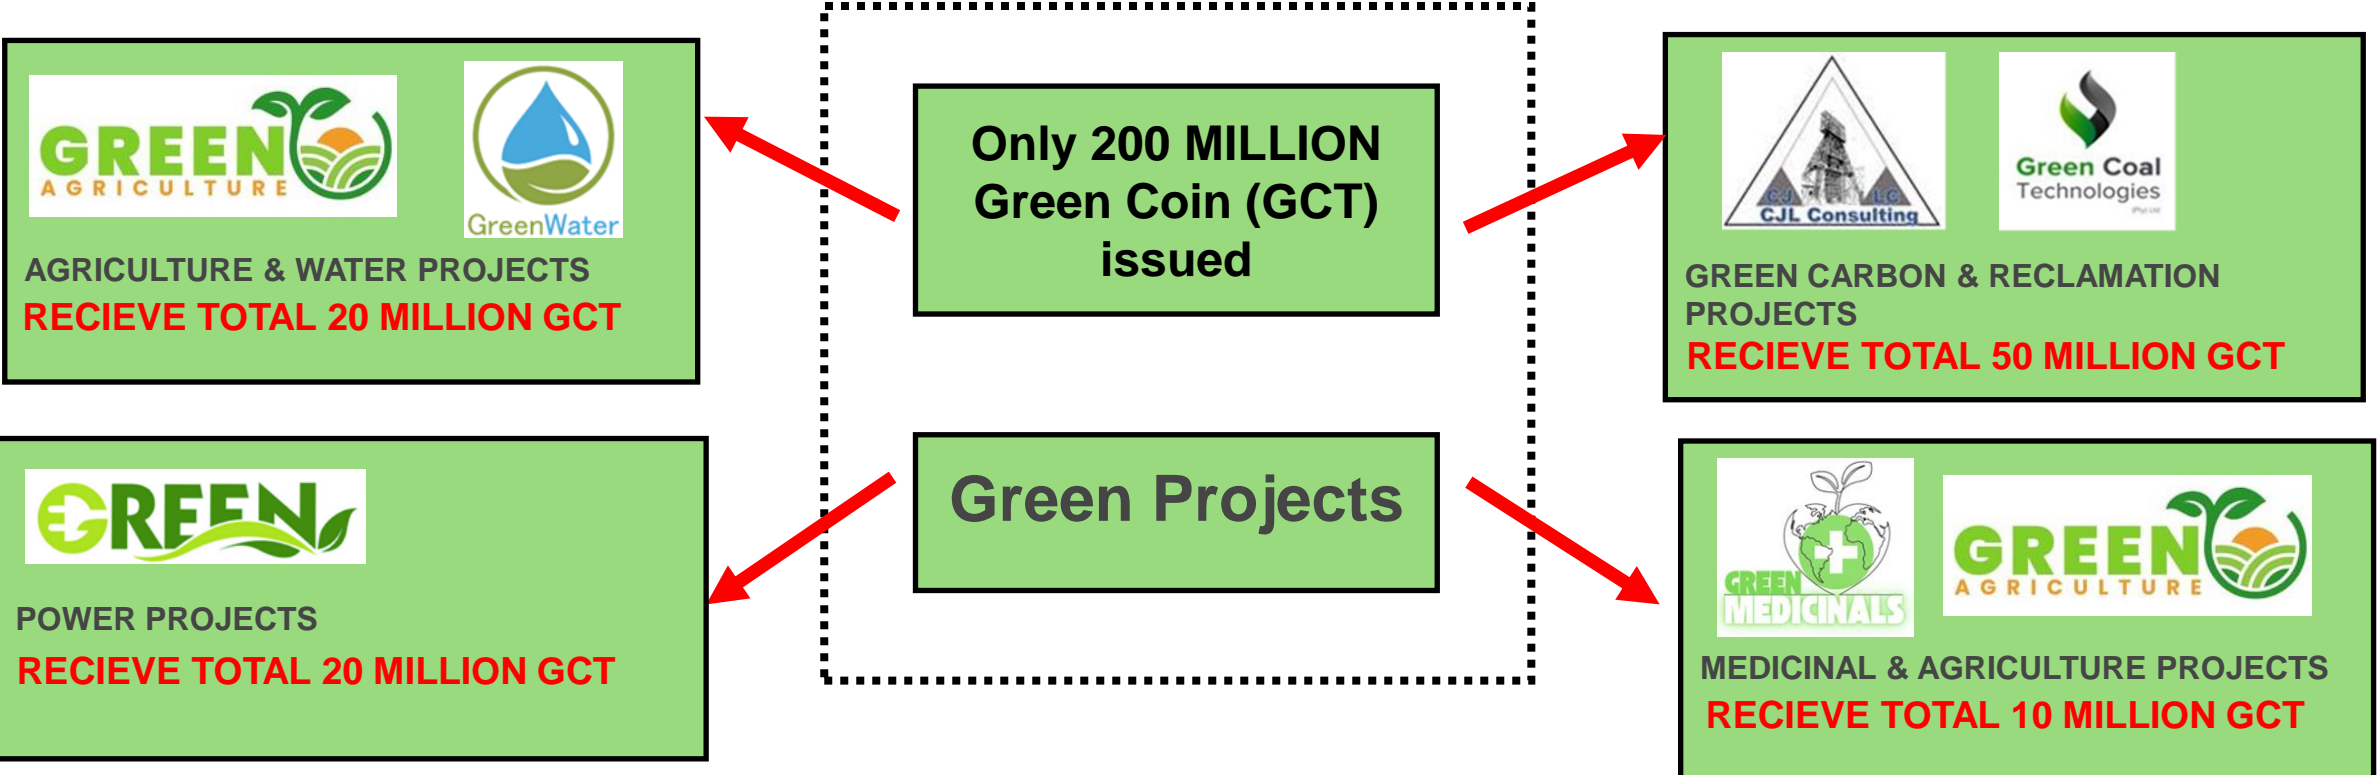

Several projects are available for investment by coin holders, spanning multiple sectors focused on sustainability and innovation:

- **Green Agriculture** – Self-sustaining organic hydroponic and aquaponic farming, minimizing water and energy consumption. Produces crops for **Green Medicinals** and public consumption.
- **Green Medicinals** – Cultivation of herbal, mushroom, and vegetable plants for natural medicinal product manufacturing.
- **Green Coal Technologies** – Environmental reclamation and clean coal production from discarded materials. Supports small-scale power generation for mines and local communities, with potential for carbon credit transactions.
- **Green Power** – Small-scale clean energy solutions for farming, mining and industry, including mechanical, wind, solar, and hydro projects. Also involves refurbishing inactive coal power stations with clean-burning **Green Power Tech** to reduce emissions.
- **Engineering Education** – Free real-time online video platform for **Green Coin** holders and students in engineering and agriculture, providing live viewing and insights into green project developments.
- **CJL Consulting** – Specializes in gold slurry dump reclamation and the recovery of mineral discard dumps, including vanadium, chrome, and iron.

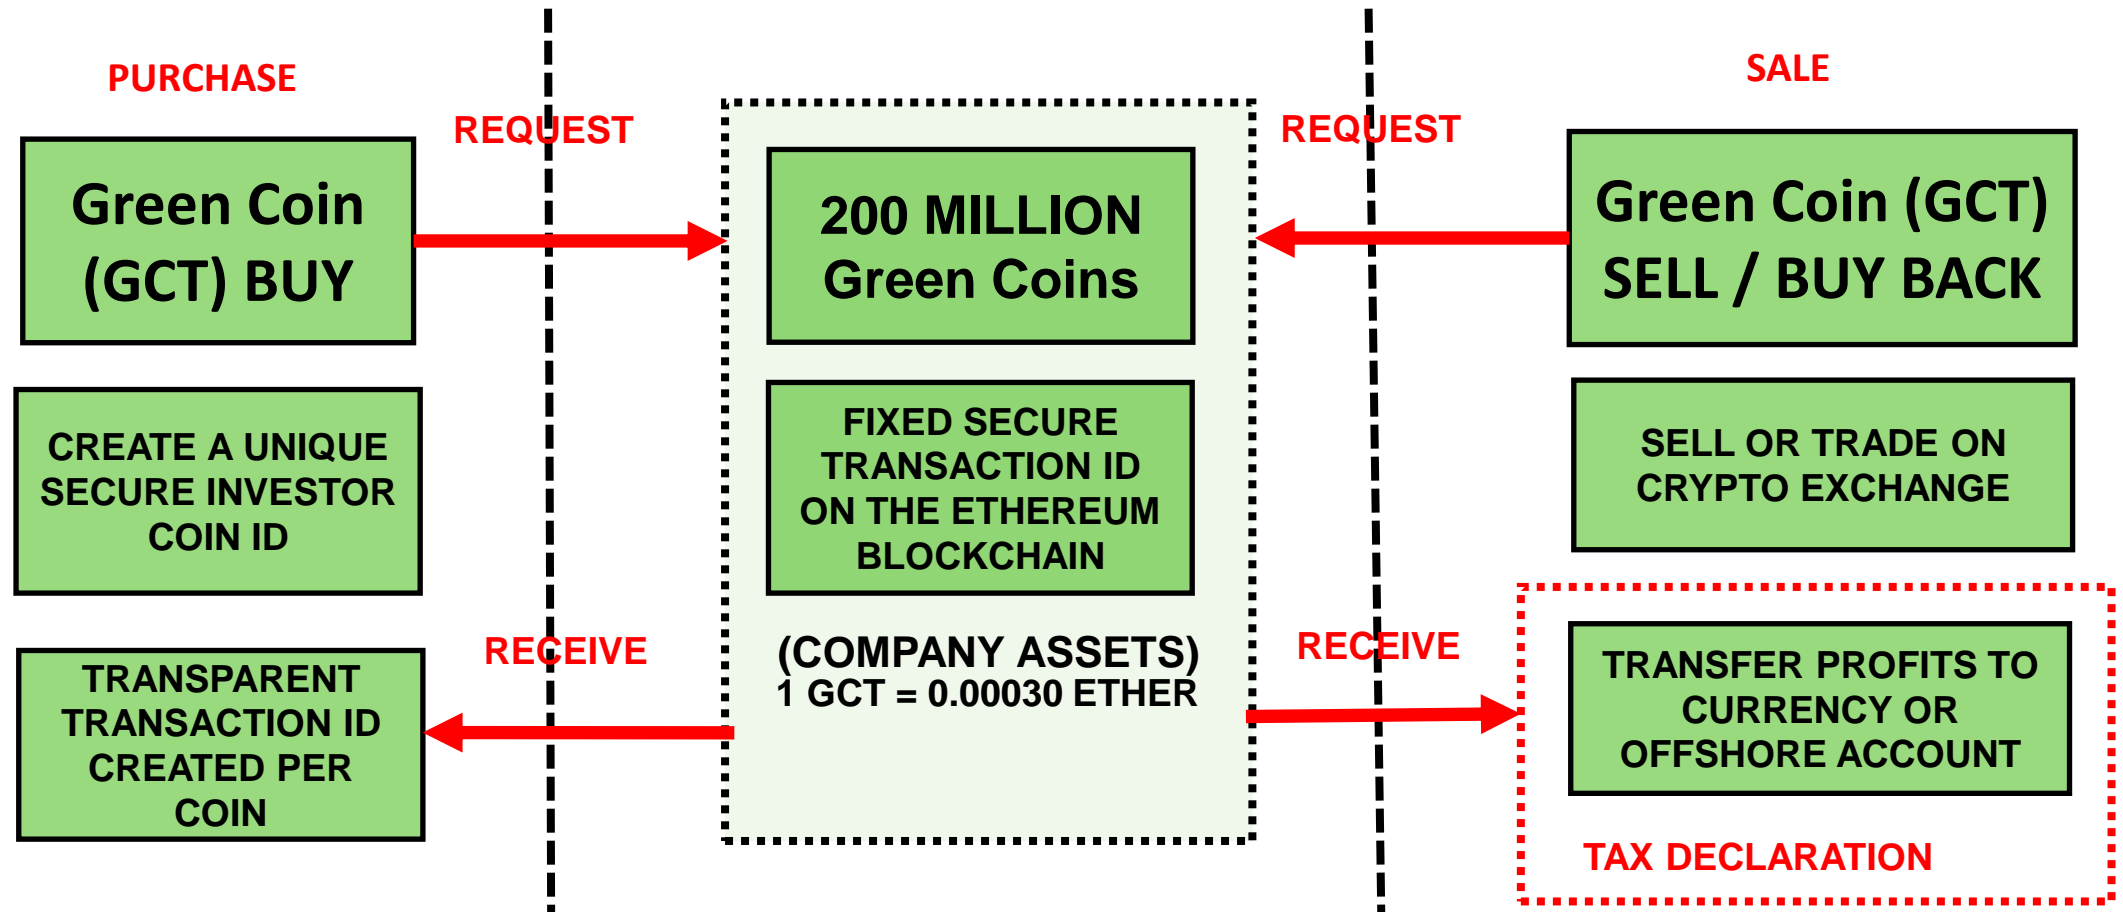

These projects align with our commitment to sustainability, resource efficiency, and environmental restoration, creating value for investors and communities alike.
